

THE USE OF NGV's WITHIN PUBLIC & MUNICIPAL TRANSPORT SYSTEMS

WEBINAR OVERVIEW

In this series of webinars, we will be discussing the advantages & benefits of implementing a successful NGV network for public and municipal transport.

Our expert speaker panel will inform you of the best technologies and strategic overview of using CNG powered vehicles for your networks.

From the comfort of your own office, this knowledge can be used individually, or shared between divisions within your organisation, creating a cost and time effective way of learning, planning, developing or executing your NGV project.

NGVA Europe 13th April 15:00pm

BIO-NATURAL-GAS FOR CLEANER URBAN TRANSPORT

- Renewable / traditional energy comparisons
- Advantages of biogas, natural gas and CNG for city transportation
- World market development and running comparisons
- European market growth overview
- Future development of NGV's
- Biogas as an alternate source of natural gas
- LNG & hydrogen fuelled transport

Biogasmax 14th April 11:00 am

THE BIOGASMAX PROJECT

- A review on the Biogasmax Project which has demonstrated over 900 vehicles running on biomethane fuel.
- Technical evidence on how this demonstration has been successful in showing biomethane really works as substitute for natural gas.
- Multiple examples of cities that has successfully procured public transport and waste collection using biomethane vehicles.
- The importance of economic incentives to promote the private market

Organic Power 14th April 15:00pm

CNG & BIOMETHANE AS A RENEWABLE ENERGY, ITS HISTORY & BENEFITS

- A review of the environmental advantages of biomethane
- Why renewable energy in the transport sector
- Why should Energy Agencies and policymakers promote CNG & biomethane?
- A review of the key drivers behind using natural gas & biomethane
- The availability and use of biomethane

Czech NGV Association 15th April 10:00am

EXPERIENCES OF THE CZECH NGV NETWORK

- Legal framework of CNG usage in public transport in the Czech Republic
- CNG bus population in the Czech Republic
- Experience of public transportation providers with CNG

EXECUTIVE SPEAKERS

Manuel Lage ~ NGVA Europe

Senior industry manager with more than 30 years experience in the truck industry, having been responsible for engine engineering, truck development, strategy and product planning, sales & marketing and business development.

Formerly responsible for IVECO natural gas vehicle development. Presently responsible of institutional relations of IVECO and Fiat in Spain.

Fluent in Spanish, English, French, Italian and Portuguese.

Bjorn Hugosson ~ Biogasmax Project

Björn Hugosson works as project manager for clean vehicles at the City of Stockholm.

He has a M Sc in vehicle engineering and has 15 years experience of projects dealing with sustainable transport solutions.

During the last years, he has focused on promoting clean vehicles, notable those running on biomethane, to the private transport sector. He is also involved in the strategic work to develop biomethane for transport in Stockholm.

Christopher Maltin ~ Organic Power

Christopher Maltin was the founder and is now chairman of Organic Power Holdings Ltd. and EcoTransit Ltd. A qualified and experienced mechanical engineer and leader of his team which designed the first systems to allow high performance engines to operate on lead-free petrol.

He consults as one of the foremost experts in the field of anaerobic digestion, and served as the UK's representative on the bioenergy committee of the International Energy Agency for eight years.

Christopher has advised governments and regional committees on the subject of organic waste treatment to produce renewable energy, clean fertilisers and sustainable fuels and he has spoken on these subjects at conferences and symposia all over the world.

Zdenek Prokopec ~ Czech NGV Association

Zdenek Prokopec has 5 years management consultancy experience, most of this time at Andersen consulting Prague.

He has served for 7 years as member of board of directors at MOTOR JIKOV Strojirenska a.s., producer of CNG vehicle refuelling appliances.

For 3 years, Zdenek served as the leader of the CNG Vehicle refuelling appliance development project. He initiated the foundation of Czech NGV association and currently works as its chairman.

LEADING TOWN NETWORK

CASE STUDY

The operator of the municipal transport fleet for the city of Nantes. With 580,000 inhabitants powered by a fleet of alternative fueled vehicles, Nantes is considered to be setting the standard in EU compliance towards green municipal vehicle conversion.

With about 2 million public trips a day, Nantes Metropole's travel policy involves intelligent efforts to enable mobility for all, whilst protecting the environment and in 2000, mapped out the PDU (Plan de Déplacement Urbain/urban travel plan) to ensure this.

WEBINAR BENEFITS

TECHNICAL INDUSTRY INTELLIGENCE

An expert panel cross section review of the latest status, costing, efficiencies, strategies and studies of NGV systems and alternatives successes around Europe

COST & TIME EFFECTIVENESS

No travel involved, plus saving on expenses and time out of the office, you simply need to have 1 - 2 hours available at your computer

INDUSTRY SPECIFIC INTELLIGENCE

Share and exchange key practices, project experience, technical findings and industry knowledge with a closely focussed bespoke audience

TECHNICAL KNOWLEDGE SHARING TOOLS

Full business exchange tools within your webinar experience including multiple surveys and polls for technical evaluation, individual and group exchange rooms allowing specific areas to be benchmarked and discussed

ARCHIVED TRAINING PLATFORM

You will keep a copy of the content presentation to be distributed at your discretion for additional technical training and knowledge sharing

FULL AUDIENCE INTERACTION

Through use of the Q&A tools, breakout rooms and speaker passing functions, full audience interaction, attention and participation is enhanced

MODERATED WEBINAR HELP

Full moderator assistance for both your technical and discussion needs will be provided for the duration of your webinar with no IT requirements

INCREASED BRANDING

The webinar will be linked to a multitude of social business and direct B2B websites within your industry to promote and increase corporate branding

MARKETPLACE KNOWLEDGE

You will be provided a complete breakdown of your industries requirements, whether aligned to your capabilities or not, allowing you to further develop existing or alternate solutions and business streams

IN SUMMARY

Each webinar is individually hand crafted with key focuses on the industries, geographies, and key contact people important to your business and development needs

Our end-to-end service is provided for you without the need for I.T. or technical training. With world leading software and unparalleled coaching and development, full impact and effectiveness is delivered simply, and quickly

In keeping with true webinar culture, all our work is completed in the most time and cost effective manner, allowing you to focus on your discussion and how you wish to communicate with your industry
